OPTIMISING AERODYNAMIC PERFORMANCE

BY  **SUNLIVE**

AeroEdge

OPTIMISING AERODYNAMIC PERFORMANCE

- **AeroEdge** presents a unique collaboration opportunity with Sunlive to establish a transformative project in Anadia, Portugal, combining aerodynamic performance testing and premium cycling experiences. This partnership aims to attract athletes and cycling enthusiasts from across Europe while positioning Anadia as a leading hub in sports science and endurance innovation.
- **Our Mission** To deliver exceptional performance-driven experiences through advanced aerodynamic testing, biomechanics analysis, thermal control strategies, and coaching workshops. Our goal is to offer structured programs that enhance athletes' achievements and provide educational value.

AeroEdge

OPTIMISING AERODYNAMIC PERFORMANCE

Key Offerings

1. AeroEdge Hour Record

- A elite-level session combining thermal regulation, personalized pacing strategies, and full aerodynamic performance data analysis.
- Participants receive a technical report, certificate, and branded merchandise.

2. AeroEdge Aero Pack – Camp

- Premium performance camp including aerodynamic testing, biomechanical evaluation, accommodation, transfers, and coaching.

3. Outdoor Aero Testing (Optional)

- Real-world testing for athletes preparing for road events or triathlons, providing insight into variable outdoor conditions.
- Why This Matters This project redefines accessibility to aerodynamic training while enhancing Sunlive's reputation as a leader in sports tourism. Together, we aim to create impactful experiences that elevate athlete performance and solidify Portugal's role in the global sports landscape.

A stylized white graphic consisting of two overlapping, elongated, teardrop-like shapes. The top shape is slightly larger and more rounded, while the bottom shape is more elongated and tapers to a point on the right. They overlap in the center, creating a sense of motion or a stylized infinity symbol.
